

## Main Foreign Birthplaces of 55–64 year-old people in Sampletown

**Key features:** Considering the main foreign birthplaces in Sampletown, the most prominent group amongst people aged 55–64 was those who were from the UK – 41% of the people from more common overseas birthplaces were in this group, the largest proportion. This was 3% greater than the proportion across all age groups in Sampletown but 7% lower than the proportion in the same age group across Australia. The other notable birthplace group in Sampletown was those who were from Italy with another 22% of people.

### Comparative size of main foreign birthplaces

difference of 55–64 people in Stirling from Australia

This bubble chart lets you see at a glance how the main foreign birthplaces of Sampletown's people aged 55–64 vary in size and differ from those of all people in Sampletown and from 55–64 year-old people in Australia. Each bubble represents one of the main foreign birthplaces; bubbles further from the centre indicate birthplaces whose share of the local 55–64 year-old people differs most from the other people. Larger bubbles mean there were more people aged 55–64 with that birthplace. Higher bubbles (eg the one for those who were from Italy) show that the proportion of 55–64 year-old people with that birthplace was larger than the proportion of all people in Sampletown. Bubbles further to the right indicate that birthplace was more common in this age group locally than in Australia (eg those who were from Italy, again).

Main Foreign Birthplaces of 55–64 year-old people	No. and % of 55–64s per birthplace, in Sampletown					all Sampletown people		55–64 people, Australia

The M/F ratio is the ratio of the number of males to the number of females. Ratios above 1 means more males; below 1 means there are more females

## Main Foreign Birthplaces of 55–64 year-old people in Sampletown

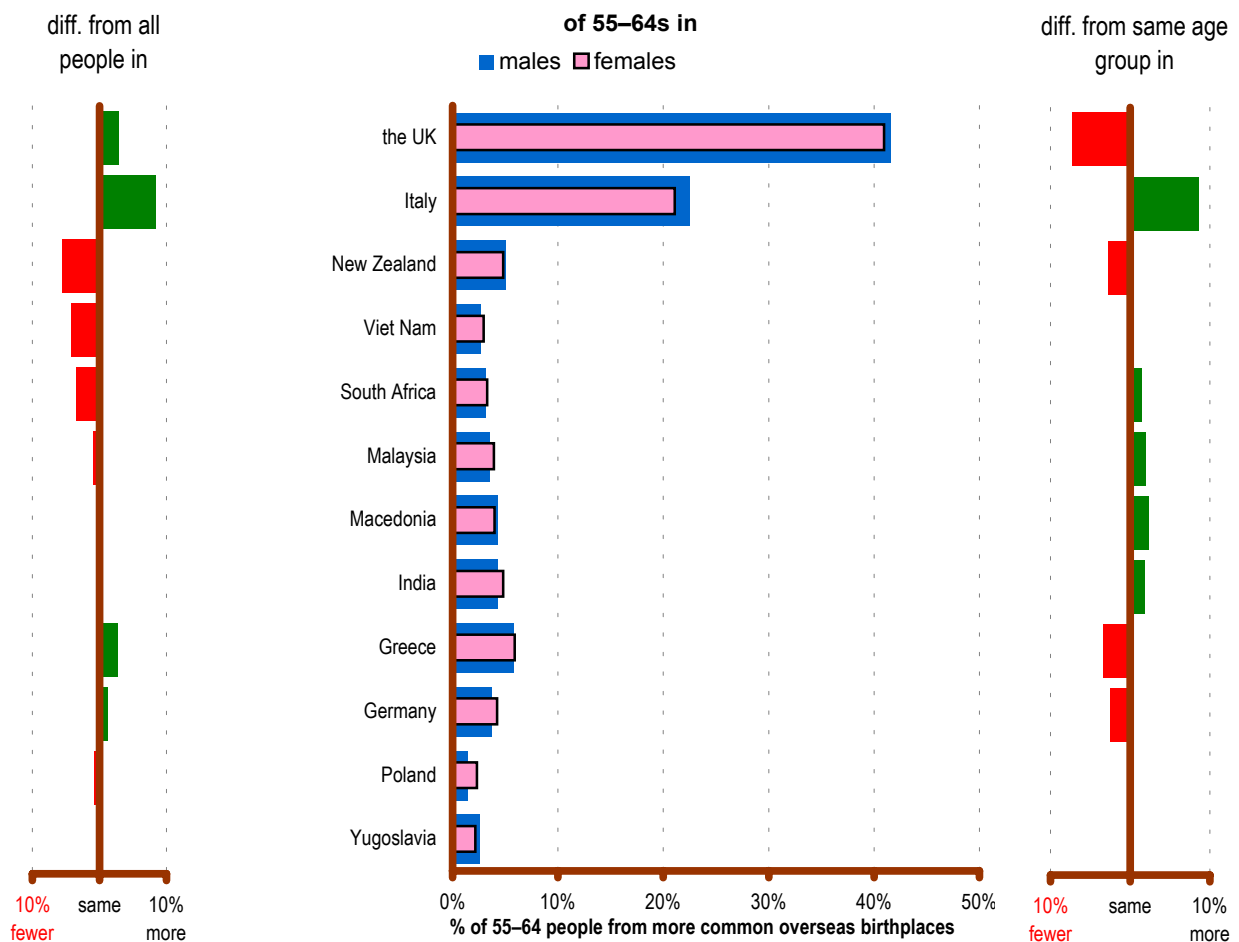

Those who were from the UK were the most common group amongst 55–64 year-old people in 2001, with 2,314 people, or 41% of the people from more common overseas birthplaces in this age group. As well, there were 1,222 people (22%) who were from Italy; 327 people (6%) who were from Greece; 275 people (5%) who were from New Zealand; 253 people (5%) who were from India; 228 people (4%) who were from Macedonia; and 221 people who were from Germany (4%).

The birthplace which was noticeably more common amongst this age group than amongst all people in Sampletown was Italy, which had 8% more of the age group than of all people from more common overseas birthplaces – 22% to 13%. On the other hand, there were 6% fewer of this age-sex group who were from New Zealand, and 4% fewer who were from Viet Nam.

Compared with the same age-sex cohort in Australia, the biggest difference was that locally there were 9% more who were from Italy. There were 7% fewer who were from the UK and 3% fewer who were from Greece.

The differences between the main foreign birthplaces of males and females is noticeable, with the male:female ratio ranging from 1.2 males per female among those who were from Yugoslavia to 0.62 (or 1.6 females per male) among those who were from Poland.

Note that these percentages are of the total number of people from more common overseas birthplaces in the age group. The total does not include any with other responses, or with unclassified responses, or who did not answer the question, or overseas visitors.

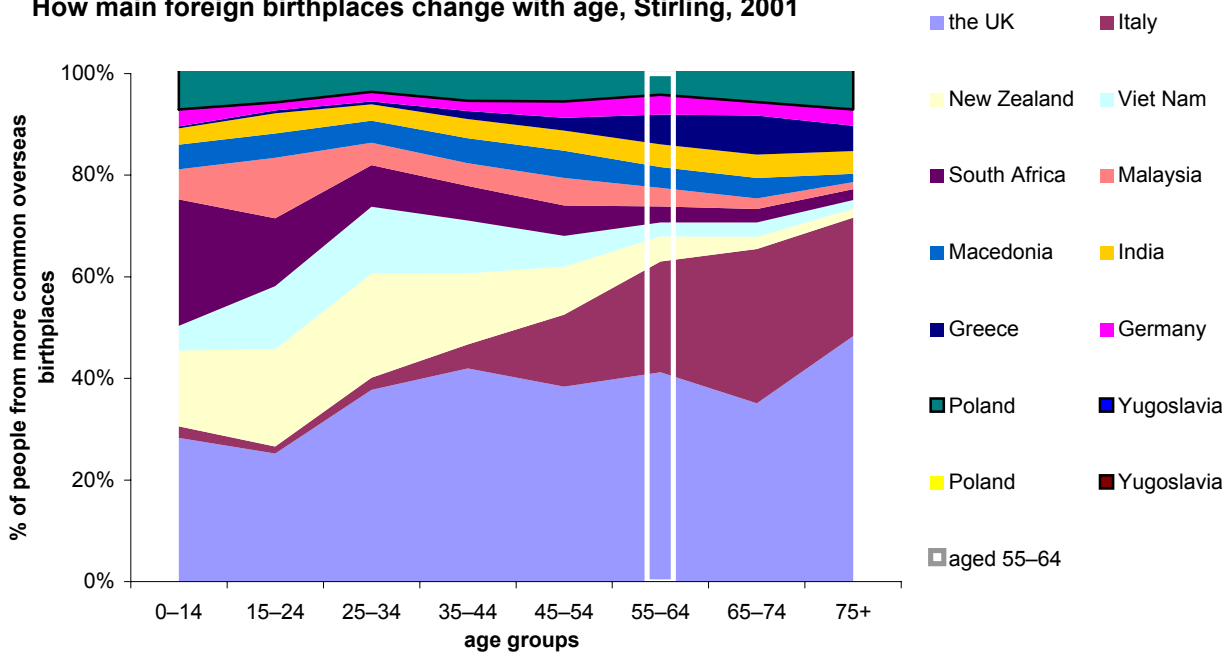

## Main Foreign Birthplaces of people in Sampletown, by age

The chart and table below illustrate how the main foreign birthplaces of people in Sampletown varied across age groups in 2001. Each band in the chart represents one birthplace – the lowest band represents those who were from the UK; the next, those who were from Italy; up to the top band, those who were from Yugoslavia. The left end of each band represents the youngest age group and the right end represents the oldest age group. The 55–64 age group is boxed.

The width of each band at any point represents the proportion of that age group who were from the birthplace represented by the band. For the 55–64 people, the widest band represents their most common birthplace, those who were from the UK. This is the bottom of the twelve bands. The band narrows from childhood; then widens from young adults to middle age, as the proportion who were from the UK increased, before staying even from middle to old age, as the proportion stayed relatively constant. The band ends widening among those aged 75+.

Similarly, the second widest band (for 55–64 year-olds) represents those who were from Italy. This is the second bottom of the twelve bands. The band narrows from childhood; then widens from young adults to middle age, as the proportion who were from Italy increased, before widening from middle to old age, as the proportion who were from Italy rose through the lifecycle. The band narrows as it ends at those aged 75+.
